Convocation

21 August 2010 (Saturday), 8.30am, IMU Bukit Jalil Campus
History of the IMU

The International Medical University (IMU) started as an exciting venture in medical education in 1991. A team of academicians led by Datuk Dr Kamal Salih, Dr Mei Ling Young, the late Dr Saidi Hashim with the help of Professor Ron Harden and Professor Ian Hart, two world-renowned medical educationists, conceptualised the International Medical College (IMC). Professor Ong Kok Hai joined the team later. This was a unique educational venture established in line with the Malaysian government’s objective of making the country a leading centre of educational excellence in the region and providing more Malaysian students the opportunity to achieve their aspirations to become doctors and healthcare professionals.

The calibre of the medical educationists and the reputation of the Board of Governors initially helped lend credibility to the project. But it was the progressive, systems based, and integrated medical curriculum that caught the imagination of the Partner Medical Schools (PMS), which wanted to participate in this innovative although somewhat daring project. After 2½ years of study in the IMC, students would be able to springboard to any of the reputable PMS in the United Kingdom and Ireland, New Zealand, Canada, the United States and Australia and receive the degree from the respective university.

The College was officially launched on 13 April 1992 by the then Malaysia’s Education Minister, YB Datuk Amar Dr Sulaiman Haji Daud in Kuala Lumpur.

This was a pioneering effort involving a private medical training institution representing a totally new and innovative concept of international partnership for the twenty-first century. The IMC had the full support of the Ministry of Education and Ministry of Health. The institution also had the support of experienced and reputable members of the Board of Governors and members of the Academic Council which consisted of the Deans or their representatives from all the PMS which met at least once a year. With the help of Professor Ron Harden and Professor Ian Hart, an international search for the Foundation Dean started in 1992. An eminent Professor of Pathology, Emeritus Professor John S Beck from the University of Dundee was appointed the Foundation Dean of the IMC. Sir Patrick Forrest, Emeritus Professor of Surgery from the University of Edinburgh joined as the Associate Dean later. In 1993, the IMC took in its pioneer batch of 75 medical students.
In 1996, after the medical curriculum had run its full course and consolidated, the IMC felt it was timely to start a collaborative pharmacy programme with the University of Strathclyde, in response to the acute need of pharmacists in Malaysia. In 1998, the pioneer class of medical and pharmacy students graduated from the Partner Universities.

On 4 February 1999, the IMC was granted university status and became the International Medical University (IMU), thus providing an additional option for students to read the whole medical degree in Malaysia, the MBBS (IMU). The IMU Clinical School in Seremban took in its first cohort of 46 students in September 1999. The late YABhg Tun Dr Mohamed Zahir Haji Ismail, Speaker of the House of Representatives became IMU’s first Chancellor.

As the student population grew, the IMU moved from its campus in Petaling Jaya to a new and larger campus in Bukit Jalil on 1 January 2000. More PMS, particularly in Australasia and the United Kingdom then joined our consortium. Having established a reputation as a premier private medical university with high calibre international connections, the IMU strives to innovate in medically-related education by developing novel curricula, new ways of delivery and assessment.

Since 1999, the University’s growth and development has been in developing clinical schools in Seremban and Batu Pahat, and in establishing research as a core activity, together with development of postgraduate research Masters and PhD programmes. In 2004, we introduced our own Honours degree course in Pharmacy. The Honours degree course in Nursing was introduced in 2005. In February 2008, the degree course in Dentistry was introduced. Five other Honours degree courses in Nutrition & Dietetics, Medical Biotechnology, Psychology, Biomedical Science and in Pharmaceutical Chemistry commenced in July 2008.

Bachelor of Nursing Science (Hons) was introduced in 2009, a programme targeted solely for registered nurses to upgrade their qualification from diploma level to a degree level. In 2010, we introduced the Chiropractic programme, the first of its kind and only complete educational programme in Malaysia as well as in all of Southeast Asia. In addition, the Chinese Medicine programme will be launched in February 2011. We believe our courses to be progressive and innovative, and we strive to use best practice in their delivery and assessment.

To remain the premier private medical university, the IMU must develop quality programmes and services of an international standards.
The mace is the symbol of authority of the International Medical University (IMU). The globe at the top symbolises the international nature of the University. Gold denotes the quality of education provided by the IMU. The seven kris (traditional Malay weapon) represent the nations participating in the International Medical Consortium. The songket motif symbolises the country’s cultural tradition. The bunga raya (hibiscus) is Malaysia’s national flower. The five facets of the mace signify the five continents of the world.

The University Mace

The second ring consists of the logo of the IMU to signify its new charter as a University. Below the second ring of the mace are the logos of the original five Partner Medical Schools which helped start this innovative medical programme.

The original International Medical College emblems are etched on each side of the brace in the third ring of the mace. Below the third ring are the logos of the international Partner Universities involved through their medical schools in the International Medical Consortium. The bottom part of the mace is carved in the shape of the Kelantanese gasing (spinning top), another symbol of Malaysian culture.
IMU Vision

IMU shall be an innovative global centre of excellence in learning and research, supporting a community of scholars and professionals committed to serving society, promoting the development of students to reach their true potential in becoming competent, ethical, caring and inquiring citizens and visionary leaders.

IMU is committed to academic freedom and the principles of equal opportunity in the pursuit and application of knowledge, the highest standards of intellectual, educational and research productivity, and the establishment of a learning organisation that respects the individual.

IMU ~ A Unique International Vision

IMU offers a unique global opportunity for medicine and health sciences professional education. The pre-clinical course delivered in IMU, Kuala Lumpur leads into the clinical course offered at IMU and 30 partner International Research–intensive Universities. The quality of these universities assures the standing of the curriculum in IMU through the Academic Council.

IMU Quality Policy

The International Medical University aims to be an innovative centre of excellence in learning and research, producing competent, caring and ethical professionals who are lifelong learners. It is committed to achieving the highest standards of intellectual, educational and research productivity.

The Logo

The initials IMU represent the name of the University. The strips on the “I” represent the three pillars of Innovation, Imagination and Insight. The snake and staff are the traditional symbols for medicine, which is the educational focus of the University. The colour white represents integrity. The globe stands for international connections: the IMU as a member of the International Medical Consortium, both in terms of partnerships with many well-known foreign universities, as well as its international faculty and student body. The tilted square represents the mortarboard, which is the symbol of academia in relation to the community. The colour blue, in its two shades, stands for peace and harmony.

Together, Learning for Health

The Motto

“Together, Learning for Health” is the IMU motto. The search for knowledge is a lifelong process. With the explosion in information, the growth of enabling technologies such as Information and Communications Technology and the globalisation of education, learning and discovery increasingly involve the sharing of resources and knowledge amongst communities of practice.
Message from the President

Convocation is a major milestone and a memorable event in the academic life of an individual. This is the time to salute individuals for their achievements gained through dedication with years of hard work, late nights and mental labour. It is important to realise that these graduates did none of this alone. It is a collective educational effort from the students, lecturers and support staff of a university. These graduates have also benefited from the support of countless people with whom they have shared their aspirations, their struggles to overcome life’s disappointments, and their successes. This is the time to specifically thank these people, parents, grandparents, members of the family, friends and all those who have generously supported these graduates in their quest for a degree.

Graduation marks a new beginning, a transition to a life of employment, challenges and responsibilities in your respective careers. Success at University enables you to have new goals to imagine and pursue, however the quest never ends and you should never stop learning. The scientific and medical world is rapidly changing and there are always new things that need to be learnt.

Pro-Chancellor

YBhg Dato’ Dr Lim Kee Jin
MB, FRCP, FRCPE, FRACP Hons, AM, FAFP Hons Malaysia, FAFP Hons Singapore, FASc
As graduates, you have had the privilege of studying at a very special and distinctive university. A university that deservedly commands an enviable academic reputation and who have achieved Tier Five: Excellent status in the Rating System for Malaysian Higher Education 2009. Achieving this rating has shown to us that this country has recognised IMU as a top-notch education provider in medical and health sciences programmes. With the granting of this status to IMU, the university will now be exempted from certain provisions in the Private Higher Educational Institutions Act 1996 (Act 555). These include flexibility and exemptions in applying for teaching permits and seeking approval to set the salary of foreign lecturers. The university can also receive certain incentives and have access to government grants. More importantly, local and international students who wish to study in IMU can now be assured that the programmes that they wish to enrol in are of a high quality that is recognised by the Malaysian government. These ratings are also a compliment to you, the graduates of IMU, current students of the university and the outstanding faculty and staff who provide an excellent first class education for these students.

We are also proud to announce that the university’s MB BS (IMU) programme has recently received accreditation from the Malaysian Qualifications Agency / Malaysian Medical Council for a period of 5 years. Our nursing programme is also progressing well with the second batch of twenty-two nursing graduates passing the Nursing Board Licensing Professional Exams, which entitles them to licensure in order to practice as registered nurses in Malaysia. Students who do well in their studies and profession as well as the recognition by the Malaysian Qualifications Agency reflect positively on the teaching standards of our university and I applaud our staff and students for the hard work. Dedication to educational excellence and professionalism shown by our faculty members are essential to who we are and what makes our university great. Their commitment to teaching and to guiding this next generation of healthcare providers and scientists is, by extension, a commitment to the health and well-being of countless people in Malaysia and around the world whose lives will intersect with our graduates.

Graduates, as today’s healthcare professionals, you must maintain a high degree of professionalism. It is also important for you to be caring, be compassionate, able to work in a team and respect human dignity.

One of the greatest challenges to be faced would be balancing your personal and professional lives. The profession that you have chosen is one that is very demanding. Clients and colleagues will want more time and attention than you can give, and you may feel that you do not have much left over for those closest to you, but don’t make that mistake. You will be better healthcare professionals, as well as a better person if you develop a balanced life. At the end of the day, your impact on the world is greatest through the people you love. Your successes will be sweeter, and your disappointments will be easier to bear, if you have the love and support of family and friends.

Today marks the start of a whole new dimension of your relationship with IMU. Even as you build your career and move on with your life, you are still part of the big IMU family, as a member of the university’s alumni. I urge you to continue your participation and contribution to the development of the University and to uphold the good name of your alma mater.

Graduation is also a time to imagine the future. For those of us here today who are older than you, we know all too well that the future seems to have its own way of unfolding, often not as we have anticipated. However, it is important for us to step back and take a large and long view of what service we need to render to the world we now inherit and will hand over to the generations who will follow you. Your lives will stretch across this century, and today we can stand on your young shoulders and, in doing so, perhaps peer even further into what lies ahead in the future.

On behalf of the entire university, I would like to congratulate you on your hard work and achievement leading to this magnificent milestone in your lives. I also wish you all the very best in your professional career while also reminding you that education is a lifelong experience. I am confident that the lives you touch in your professional lives will be better because of your presence. The future of healthcare needs great things from all of you and having the right education to meet today’s challenges, I am confident you are up to face them head on. You have what it takes on all counts. May you rise up to the challenges ahead with dignity and pride and play your part in the delivery of quality health services in this country. The knowledge, expertise and skills that you graduate with today will make you, each and every one of you, immensely precious and vital people who are capable of making a powerful contribution to our society.
