Welcome to IMU

A very warm welcome from the International Medical University (IMU), a university with a vibrant, friendly and diverse community and a tradition of receiving international students.

At IMU, we enjoy an international reputation, and provide high quality education at pre-university, undergraduate, postgraduate and continuing professional development levels to students from all over the world. The University currently has approximately 300 international students representing over 43 countries. In addition to this, the University has academic staff from more than 18 countries worldwide.

With more than 23 years of experience, we aim to make your studies and stay at IMU one of the most enriching periods in your life. The University has maintained a great learning environment for its students using the principles of student-centred, outcomes-based education and demonstrated a strong commitment to the community since its inception in 1992.

Going to the right university is one of the most important decisions you can make. As you browse through these pages, you will learn more about the uniqueness of the IMU where students have an education that will allow them to utilise not only what they have learnt in the University but to do good and continue to do so as professionals and make a lasting impact on the lives that they touch. I hope that this Guide will be useful to you and assist you in making your right decision.

I very much look forward to meeting you.

Dr Mei Ling Young
Provost
BA, MA (Hons) (Auckland), PhD (ANU)
Why IMU

1 An Established Private Healthcare University
IMU is Malaysia’s first and most established private medical and health sciences university with over 23 years of dedicated focus in healthcare education. In 2013, the University’s Village Adoption Project at Kampung Tekir, Malaysia won First Place in the Maclennet Prize for Global Citizenship, beating 65 other universities from all over the world. In the same year, its School of Medicine was conferred the Association for Medical Education in Europe (AMEE) ASPIRE for Excellence Award in the area of “Student Engagement” at the AMEE conference in Prague, Czech Republic.

2 A Specialist University with 100% Focus on Medicine and Health Sciences
IMU is a university wholly specialising in medicine, health sciences and complementary medicine programmes which means that all resources are devoted to excellence in this area of education. Comprising of five schools in the Faculty of Medicine and Health, the IMU has something to offer everyone interested in pre-university, undergraduate, postgraduate and continuous learning programmes in the field of healthcare. International students can choose from this range of programmes and study options, to study the entire degree in Malaysia or to study part of the degree in IMU and then transfer to one of IMU’s Partner Universities.

3 Integrating Education with Research and Healthcare Practice
IMU is also pioneering the close integration of Research and Healthcare practice together with Education. International students get early exposure to research projects by interacting with the established IMU Institute for Research, Development and Innovation (IRDI) throughout their degree. Over the years IMU has also established partnerships with leading hospitals in the country to allow its staff and students to get continuous and extensive real-life clinical experience. It also operates its own private clinics, IMU Healthcare, in areas such as Dentistry, Chiropractic and Chinese Medicine to ensure close integration of real practice with education.

4 Partner to the World’s Prestigious Universities
IMU pioneered the partner university model. It has established a strong global network of more than 30 partner institutions of higher learning. These collaborations cover most of the undergraduate programmes offered in IMU. IMU’s diverse partner universities include universities from Australia, New Zealand, Canada, United States of America, Ireland, China and United Kingdom. With these partners, international students can be assured that they will receive an education that are of international standards and recognition.

5 Renowned and Highly Experienced Faculty
IMU’s lecturers are highly-qualified in their fields of expertise with extensive experience in not only academia (teaching, research and publications) but also in clinical/professional practice. Through exclusive arrangements with our Partner Universities, senior faculty members from those universities participate in yearly quality assurance reviews which ensures that IMU’s benchmarks global standards. Some also come as visiting lecturers to teach specialised subjects on a rotational basis at IMU. International students can benefit from having a variety of faculty members with diverse points of view and student engagement experiences.

6 IMU Learning Philosophy Produces Competent and Caring Healthcare Professionals
IMU’s Learning Philosophy is grounded on its core values, which fosters students’ development into knowledgeable, competent and caring healthcare professionals who are critical thinkers, reflective and yet proactive. The IMU Cares programme provides ample opportunities for IMU students and staff to engage and serve the community. Active involvement in the community allow students to translate knowledge gained in classrooms into health education to the public, enhance communication skills and strengthen professional and technical skills in real world environments. All this combines to create graduates who are committed to lifelong learning and imbued with a sense of good citizenship, leadership and ethical behaviour. These qualities will equip international students with the qualifications to succeed in a competitive environment anywhere in the world.

7 Employment Ready Graduates with a Professional Network of Peers
At IMU students will have relevant clinical exposure and / or industrial placements which better prepares them to become a healthcare professional, giving them an advantage in the employment market. In addition students will study alongside a diverse population of students and practitioners from all healthcare fields. This inter-professional learning allows students to appreciate how the different fields in healthcare practice relate and complement each other, which better prepares them for employment. Students will also have the chance to develop strong friendship amongst peers that will be the foundation of an extensive professional network upon graduation which will facilitate your career development.

8 International Community
IMU’s international community includes a diverse faculty from more than 18 countries and more than 300 international students from 43 countries. These international students will have the opportunity to live and interact in a multi-ethnic and multi-cultural society. Experiencing a diverse culture, languages and religions will broaden the students’ outlook and will benefit students in the future.
IMU pioneered the model of credit transfer to partner universities outside Malaysia. Thus the curricula used in our undergraduate degree programmes are benchmarked to standards adopted by our international partners, which include excellent universities in Australia, New Zealand, Canada, the United States of America, Ireland, the United Kingdom and China.
We are international in terms of students, faculty and partner institutions. We now have more than 300 international students representing 43 countries worldwide, and our academic staff hail from more than 18 countries.

Our multicultural community is vibrant, friendly and enriching. We learn from different cultural perspectives. Because cultural diversity is a fact of campus life, each day is an opportunity to meet and engage with someone who has had a completely different life experience from your own.

A career in medicine can be physically, intellectually and emotionally challenging, but as rewarding. At the IMU School of Medicine you will be instilled with attributes that are important in the making of a doctor: dedication, compassion and lifelong learning. This is how the School of Medicine prepares future doctors for the challenges and opportunities that lie ahead in patient care, service and research.

To date, the School has the highest number of faculty members, students and successful graduates compared to any other private medical schools in Malaysia. The School continues its tradition of excellence with a diverse student body, experienced and committed faculty as well as excellent facilities for education and research, and good access to patients in primary to tertiary care facilities.

Whether teaching, doing research, or providing services to the community, our faculty are united in their efforts to train outstanding clinicians, scientists, and community health workers.

“I’m proud of coming to IMU. It has just not shaped me up to a more responsible person, but it has given me the opportunity to be around a friendly interactive environment and has taught me to gauge my accomplishments by the number of hearts I have touched!”

Mahfuja Islam
South Africa
Medical Student

“Being an international student at IMU has been both a benediction and a challenge so far. However the challenges I have faced as a medical student has infinitely increased my strength in character. Apart from the fantastic lectures and excellent facilities provided at the Clinical Skill and Simulation Centre, my most educative and enjoyable moments have been encompassed around the Problem-based Learning sessions in IMU. It has offered me a sense of community and collegiality, which is one of the core value’s emphasised in the University. It goes without saying it has made some of the most academically challenging times of my life ridiculously fun!”

Sadhamini Weeraratna
Kenya
Medical Student
The IMU School of Dentistry provides education for undergraduate dental programme to prepare students to practice dentistry in the 21st century with knowledge and skills to deliver patient-centred care to different patient populations and varied practice settings, ethically and professionally. The School presents a dynamic curriculum that provides excellent clinical training with exposure to the various dental specialties, integrates the health sciences with clinical experience and utilises modern technology.

The School of Dentistry is distinguished for its preparation of graduates to achieve excellence in the profession and demonstrate an extraordinary compassion and commitment to the service of others. The School’s reputation flourishes because it attracts and retains talented faculty members dedicated to teaching, clinical practice, ethics, service and research.

“...IMU offers students a strong practical approach and wide community outreach. I visited villages, interacted with local people and tried to overcome language barriers which itself was probably the most fantastic experience I had. IMU has taught me how to manage patients holistically rather than focusing on one aspect of dentistry and I am confident that I can serve the community to my best capability.”

Arslan Sheikh
Pakistan Dentistry Graduate
School of Pharmacy

IMU School of Pharmacy currently has the highest number of faculty members and registered students of any other private pharmacy school in Malaysia. We enjoy a lively and stimulating academic environment in which lecturers, researchers, professionals and students interact. All are connected by an interest in medicines – how they work, how they are made and how they are used by people to prevent and treat disease. The School delivers a diverse mix of undergraduate pharmacy and pharmaceutical chemistry programmes that meet the needs of a changing world. Both of these fields of study are in demand and our graduates successfully transition into careers within the pharmaceutical and healthcare industries. Our faculty, students and alumni remain passionate about enhancing the quality and scope of the profession through serving those most in need.

“Thinking about studying in a completely new environment made me both very excited and worried at the same time. However, with help of IMU and friends, blending into this new life style was effortless. IMU provides an excellent study environment and is a remarkable place to gain knowledge. IMU not only develop well-educated pharmacists but other healthcare professionals as well.”

Je Ho Shim, Ryan
South Korea
Pharmacy Student
School of Health Sciences

An education in health sciences can open doors to a highly rewarding yet challenging career. At the School of Health Sciences, you can choose from a diverse range of undergraduate programmes: Nursing, Dietetics with Nutrition, Nutrition, Biomedical Science, Medical Biotechnology, Psychology, Chiropractic and Chinese Medicine.

As one of the five Schools within the IMU’s Faculty of Medicine and Health, the School of Health Sciences is committed to educating a new generation of competent and ethical healthcare professionals vital to the delivery of quality patient care. You will be learning in an environment that promotes teamwork, mutual respect, lifelong learning and continuous development. As a graduate, you can apply the knowledge and skills to a multitude of settings. Our degree programmes will help provide you with a competitive edge that you need to meet tomorrow’s healthcare challenges.

“When I first joined IMU I found myself been a very shy person who could hardly join any activity but now I can say that I have gained so much confidence in myself. The IMU family are caring and loving and I guarantee that you will never feel lonely. Their system of learning is wonderful. You can always depend on your lecturers and even your seniors for any help you need.”

Fatou K Jaiteh
Gambia
Biomedical Science Student
School of Postgraduate Studies

The School of Postgraduate Studies supports, administers and coordinates the training of higher degrees (MSc and PhD) by research and taught MSc programmes within the Faculty of Medicine and Health. As one of the five Schools in the Faculty, the School of Postgraduate Studies strives to ensure that all these activities are carried out to the highest standards.

This School aims to enhance the quality of all aspects of the postgraduate and postdoctoral experience, both academic and social. The School continually attracts some of the best academics in the world, and many have become leaders in their fields. The School intends to produce graduates with attributes that are sought by a wide range of employers, facilitates the development of research amongst its staff, strengthens linkages with other research institutes, and facilitates research-led approaches to teaching.

“IMU is a university that has a programme that will help me achieve my goal. This is the reason I chose IMU. The cultural diversity is fascinating and everyday I get to experience and learn something new. The lecturers are not just proficient in their disciplines but also very experienced in supervising students in and out of the classroom. IMU provides a learning environment that is student-centred and I am glad to be in one of the best schools in Malaysia studying the MSc in Public Health programme.”

Admission Requirements

Pre-University Programme
To enter our Foundation in Science programme, you would need 5 credits in O-Levels or equivalent qualification and an overall band score of 5.0 or equivalent for IELTS.

Undergraduate Programmes
To enter any of these degree courses you need suitable pre-university qualifications and a proficiency in English, as measured by the IELTS. For details please see www.imu.edu.my/req-ug.

Subject to meeting specific entry requirements, international students with other qualifications are also eligible to apply. For application into the university with other qualifications, please contact our International Marketing Office at international@imu.edu.my.

Postgraduate Programmes
For entry, you need a good first degree in science or an equivalent qualification, and/or relevant work experience, and proficiency in English at IELTS band 6.5. For details, please refer to www.imu.edu.my/req-pg.

How to Apply

Application can be done online via www.imu.edu.my.

Prior to the application, please prepare the following documents as you will need to upload these onto website:

- Verified copies of your academic qualifications
- Evidence of English language proficiency
- A copy of the identification page of your passport

You will also be required to pay application fee.

Please note that achieving the minimum entry and English requirements does not guarantee admission. You will be competing against other candidates for a place on the course of your choice.

The IMU has a number of accredited overseas representatives throughout the world for you to connect with the University in your own country. You can apply to the University through these representatives and they will be able to assist you if you need additional assistance in making your application. For more information on our overseas representatives, please contact our International Marketing Office at international@imu.edu.my.
Accommodation

Finding the right place to live is important, especially if this is the first time you are living away from home. There are many options on housing in Bukit Jalil.

Accommodation managed by IMU

The IMU accommodations are located at the Vista Komanwel and Covillea Bukit Jalil condominiums. The condominiums are within walking distance of the Bukit Jalil campus. Rooms are available as either single or twin sharing. Communal facilities such as the common kitchen / living / dining area would be shared for use among your housemates.

In general, each accommodation unit comes fully furnished with refrigerator, microwave oven, jug kettle and kitchen cabinet, study table and chair, bookcase, single bed, mattress, dining table, lounge set, coffee table, wardrobe, curtains, ceiling fan in all rooms including living and dining area. All residents will have access to recreational facilities as well as enjoy the convenience of laundry services and mini market nearby.

The accommodation is on a first-come, first-served basis, subject to availability. Rental for each student ranges between RM2,500 to RM10,800 per semester, depending on the room size and facilities provided.

For more details, please go to www.imu.edu.my/accom.

Private Accommodation

Private accommodations are also available to all students. For more information, including listing of private accommodations, please contact IMU Student Services Department at studentservices@imu.edu.my.
Support Services

The journey through University can be exciting, challenging and stressful, and healthcare degree programmes are demanding. The University can help you manage the many things you will need to manage in addition to your academic work. We want you to have an enjoyable and enriching journey.

Prior to Arrival
As an international student, you will require a student visa / student pass to pursue your studies with us, and the University staff will be assisting you throughout the process of application for a Student Pass prior to arrival into the country. Student Pass charges are imposed by the Malaysian Ministry of Education and Immigration Department and are payable by students. You will be advised on the relevant charges when collecting your passport. With an outstanding rating of “Tier 5-Excellent” for higher education institution, as an IMU student, you are not required to have a university staff to escort you through the Immigration Desk.

Insurance Coverage
As an international student at IMU, you would receive medical insurance coverage throughout your study period in Malaysia. This is also in compliance with the Malaysian Ministry of Education’s Code of Ethics. You will be insured against personal accident, hospitalisation and surgical procedures as long as you are our current international student (with the exception of deferred students). In addition, if you pursuing our Medicine, Dentistry, Nursing, Chiropractic or Chinese Medicine programme, you are also insured for personal liability coverage.

Personal Health Support
Our on-campus Healthcare Centres provides the necessary healthcare services and this includes Medical, Dental, Chiropractic and Chinese Medicine. Our Centres offer services that range from basic primary healthcare to advanced specialties and sub-specialties that are suitable for patients of all ages and backgrounds.

Counselling
Our friendly and experienced staff from the Counselling Unit offer confidential and one-to-one sessions to all our students at the Bukit Jalil and Seremban campuses.

The Counselling Unit also provides a wide range of services aiming to assist and facilitate your university life within the social, developmental and academic context. Besides individual counselling, our Counselling Unit also organises talks, workshops and facilitate group counselling. We hope to assist you in minimising possible distractions and managing the obstacles that you may encounter in your studies and personal life.

Our Counselling Unit also oversees a mentor-mentee programme which connects faculty members to students to provide guidance and support while they are in the University. We hope that the services provided would help you have a better time in the University.
Money Matters

Undertaking university study will significantly change your pattern of expenditure from before you start university. Planning your finances (budgeting) becomes even more important, especially as you will live and study in Kuala Lumpur for a number of years. Kuala Lumpur is the financial capital of Malaysia and is more expensive to live in than other cities, although living costs in the Bukit Jalil area are lower than in the city centre.

Apart from university tuition fees you need to plan for expenditure on food, accommodation, transport, mobile device connectivity and leisure. These costs will depend on where you choose to live, your interests and lifestyle, but estimated total monthly expenses range from RM2,000 to RM3,000.

To help you plan your budget, the following guide would serve as a brief estimate of some essential expenditures while you are in Malaysia:

**Accommodation**
Monthly hostel rental range between RM500 – RM2,200 and private (condominium) rental between RM500 and RM1,200. Rentals vary according to location, room type and whether shared or single; amenities are provided.

**Food**
RM500 – RM700 monthly. The amount depends on how expensive your tastes are. When dining in the cafeteria on-campus, each meal should not cost you more than RM10.

**Travel**
RM100 – RM200 monthly (using public transportation). It may be much higher if you travel by taxi.

**Social Life**
Dependant on your choice of lifestyle, lavish or average.

**Other expenses**
RM400 and upwards. These include toiletries and laundry; mobile phone and internet charges; stationery, social activity.
About Malaysia

Malaysia comprises two land masses in South East Asia – the Peninsular Malaysia and East Malaysia, which is the northern half of the island of Borneo.

The Peninsula lies just above the equator, so Malaysia enjoys warm, sunny and humid equatorial weather all year round, with some months wetter than others.

Malaysia is a constitutional monarchy with thirteen states and a population of 28 million. Malay (Bahasa Malaysia) is the official language and Islam is the official religion. But English, Indian languages, Mandarin and Chinese dialects are widely spoken, as are languages of peoples indigenous to Borneo, which has unique ethnic communities of the Malaysian states of Sabah and Sarawak. Nowhere is there such an exciting diversity of cultures with their festivals, beliefs, customs and traditions.

With such varying ethnic composition, it is no surprise that a great diversity of religions is prevalent throughout Malaysia. The Malaysian currency is “RM” which stands for “Ringgit Malaysia”. The electricity voltage in Malaysia is 220-240 volts.
KL has many attractions including forest reserve park, lake gardens and iconic architecture including the Petronas Twin Towers.
Kuala Lumpur

Kuala Lumpur, Malaysia’s biggest and most populous city, is the capital city of Malaysia and a modern cosmopolitan of ethnic diversity. It is situated midway along the west coast of Peninsular Malaysia. Amidst its fast paced life and modernity, Kuala Lumpur is a cultural melting pot, radiating an exciting and enticing charm with its delightful mix of cross-cultural influences, traditions, varied cuisine, first class attractions, entertainment and shopping facilities. All in all, to leave you in awe. Popularly known as KL, this city has become host to many international sporting, political and cultural events including the annual Formula One Grand Prix since the 1990s. The transportation system in this city is a cooperation of complex systems of infrastructure. KL has an unrivaled transportation system in Malaysia, including an integrated rail network, and an automated driverless metro system, extending its network right into the heart of the city. For more information on Malaysia and Kuala Lumpur, visit:
www.tourism.gov.my
www.dbkl.gov.my

Bukit Jalil

The University is nestled in a small suburb, Bukit Jalil, about 20 km south of the city of Kuala Lumpur, away from the hustle and bustle of hurried life. Fortunately Bukit Jalil is easily accessible as it is conveniently located within a 5-minute walking distance to the Sri Petaling Light Rail Transit (LRT) station, which connects to the rest of the transportation networks around the city. As well as everything on campus, the University is also right next door to Bukit Komanwel, a hilly reserve park serving as a great space to refresh, recharge and unwind. In addition, the campus is situated near the National Sports Complex in Bukit Jalil, allowing students to gain access to world-class sports facilities for swimming, football, hockey, squash and a host of other sporting activities. The stadiums are also the main venues for a variety of events, including sporting events and concerts for various top local and international singers.

In Bukit Jalil, students have all the advantages of a modern city life and yet they are also a part of a sociable and relatively safe student environment. As a venue of the 1998 Commonwealth Games, Bukit Jalil is about 50km or a half an hour drive from Kuala Lumpur International Airport (KLIA).
Student Life

University life is more than just study. Aiming for a well balanced life, we hope that you will have ample opportunities to engage in new friendships, interests and experiences while you are in Malaysia.

This will help you gain a unique outlook that can only be achieved from a truly international education. Malaysians have a reputation for their warm hospitality and as a student here, you will undoubtedly gain a great deal from this supportive study environment.

Like the rest of the students, you will start off your studies in a foreign place knowing very few people or perhaps none at all! But rest assured, Orientation is here! Our Orientation activities would help you fit in just as easy. Organised by your senior peers, our Orientation programmes would help you foster new friendships amongst your batch mates and your seniors and also help you to assimilate to this new environment called University life.

Sometimes, a friend is all you need, so don’t miss out on all the opportunities to meet with other students! Get involved in campus life by joining as many clubs and societies as you want. In IMU, we have a diverse range of student clubs and societies be it from sports to social to cultural and religion ones, coming to a total of more than 50 clubs and societies. And do make sure to sign up for the International Student Society! Hopefully you will be able to meet with friends all over the world.

Besides all these that we have to offer, you can always form a study group with your friends, connect with a sporting team or participate in the various volunteer programme around you. Whilst you are here, we strongly encourage you to participate in IMU’s annual events such as IMU Cup, IMU Ball, IMU Charity Run, IMU Art Competition and many more. This is definitely the chance for you to shine and show the world your hidden talents, be it sports or arts and not just academics!
