What Is IMU's Pharmacy Practice Programme About?

Overview

The Master of Pharmacy Practice (MPP) Postgraduate degree programme is an opportunity for pharmacy graduates to expand professional knowledge and skills sets, including research, relevant to their careers. The MPP programme is the first of its kind to be offered by a Malaysian private institution and uniquely, offers three specialisations -

- Clinical Pharmacy
- Social & Administrative Pharmacy
- Pharmacy Management

Flexible programme structure and blended-mode delivery means that working pharmacists can study for a postgraduate degree. Continuing learning adds value to their professional work, and their work informs their learning. The programme is open to all pharmacy graduates, Malaysian or international.

This programme is available full-time as well as part-time and just perfect for those pharmacists looking to create an impact on their professional practice and take the next step in their careers - whilst continuing to work.

DEGREE / DURATION

Master of Pharmacy Practice

Full time: 1.5 years

Part time: 4 years

COMMENCEMENT

March and September

A Word from the Programme Director

“The pharmacy profession is undergoing evolution worldwide, and ‘Modern day pharmacists extending their professional roles to meet the changing healthcare needs around the world’. This Master’s programme can help pharmacy graduates to develop into an advanced practitioner, with enhanced leadership and research skills. The programme is offered in a blended mode, which means that you can continue in practise whilst undertaking postgraduate education.”

DR MARI KANNAN MAHARAJAN - Senior Lecturer and Programme Director
PhD (SASTRAU), MPharm (AU), BPharm (TNMMU)

How Does the Programme Work?

Pharmacy Practice Programme Structure

The programme is offered in a blended mode, which means that you can undertake much of the study online, with some weekend on-campus sessions to attend face to face teaching and learning sessions. The online platform will allow you to access all the contents anytime anywhere. The face to face teaching and learning sessions will be scheduled on weekends to allow the working pharmacists to continue their job/practice and complete the master's degree.

Top: A competent pharmacist with professionalism is required for the pharmacy profession in the 21st century.

Left: Effective communication in practice has a profound effect on health outcomes as well as patient satisfaction and experience of care.

Bottom: Blended learning mode is able to personalise education and offers the conveniences of online learning combined with the social and instructional interactions.

Why Study Pharmacy Practice at IMU?

1

An Established Private Healthcare University

IMU is Malaysia's first and most established private medical and healthcare university with over 26 years of dedicated focus in healthcare education. IMU achieved the SETARA-2017 Tier 6 status (Outstanding) under the Mature University category.

2

Specialisation Options

The Master of Pharmacy Practice (MPP) programme offered by IMU is a first of its kind PG programme. There are three streams, namely Clinical Pharmacy, Social & Administrative Pharmacy and Pharmacy Management. The choice of stream is based on your preference, career needs and aspirations. Learning from MPP can be immediately applied into your practice.

3

Advantageous Blended mode

The programme is offered in a blended mode, which means that you can undertake much of the studies online, with some weekend on-campus sessions to attend face to face teaching and learning sessions. In MPP, the majority of the content will be delivered using IMU online portal. The percentage may vary between the modules, based on the contents and the type of teaching and learning activities. Most of the face-to-face sessions will be on Saturdays. This will allow you to continue your practice whilst undertaking postgraduate education with the potential to significantly build your career.

4

Research facilities and Options

Students will benefit from the university's research collaborations with various local and foreign institutions. Close links have been established with Hospitals and Pharmacies in Malaysia. With the help of research supervisors, the students will be able to design their research projects, including but not limited to Clinical Pharmacy, Community Pharmacy, and Pharmacy education.

The research topics can be selected by the student based on their stream, and the working pharmacists have an option to do their research projects at their workplace. The research supervisors from IMU will help you throughout your research period and you will be able to publish the results of the study at the end of research semester. Students can expect personalised attention from the research supervisors.

5

Flexible Schedule

MPP is available full-time as well as part-time. A part-time student can extend the study duration up to 4 years. The tuition fee for a full-time and a part-time candidature are the same. For a part-time candidate, the schedule for the fee payment is based on his/her selection of the modules in a particular semester. Both full-time and part-time mode will allow the working pharmacist to continue their job and continue their studies. The students can access the content of the course through online anytime, anywhere and contact their tutors when needed.

How Much Does It Cost?

Pharmacy Practice Programme Fees

All fees quoted are in Ringgit Malaysia unless stated otherwise.

All IMU alumni who are self-funding their postgraduate studies and meet the eligibility criteria will be eligible for a reduction in tuition fees.
