- Registration fee and refundable caution deposit are payable upon acceptance of the offer letter issued by the IMU Admissions Office.
What is IMU’s Medical and Health Sciences Programme About?

OVERVIEW

Postgraduate research forms a major part of IMU’s activities in its role as a leader in healthcare provision and innovation. Working for a higher degree in research gives students the opportunity to acquire in-depth, specialised knowledge and to apply leading-edge techniques and methodologies. The University prides itself on the facilities and support it provides to research students and on the calibre and dedication of its academic, clinical and technical staff. In addition, researchers have published their findings in high impact journals.

The University allocates more than RM1 million internal funds for research every year. Alongside this commitment, our researchers have also successfully obtained significant amounts of external grants from funding bodies such as the Ministry of Higher Education (MOHE) and Ministry of Energy, Science, Technology, Environment & Climate Change (MESTECC) in recent years. Our researchers have received funding for collaborative research projects in nasopharyngeal carcinoma, colorectal carcinoma, breast cancer, infectious diseases and environmental health.

* Students must fulfill the criteria as approved by the Senate in order to graduate within the minimum duration

COMMENCEMENT

Throughout the year
The IMU postgraduate programme leading to the MSc/PhD in Medical and Health Sciences is primarily obtained through research. Research areas include bioactive molecules and drug development, therapeutics, pharmaceutics, cellular mechanisms and molecular basis of pathogenesis, cancer research, clinical research, community-based health issues, nutrition and dietetics, environmental health and behavioural studies. Supervisors are highly experienced faculty members with impressive track record in research and international recognition.

PROF CHU WAN LOY
Dean, School of Postgraduate Studies
BSc (Hons) Biochemistry (UKM), PhD (UM)
How Does the Programme Work?

MEDICAL AND HEALTH SCIENCES PROGRAMME STRUCTURE

The areas of research expertise of the IMU faculty are as follows:

- Cancer / Oncology
- Environmental Health
- Toxicology / Molecular Biology / Biotechnology
- Biochemistry
- Microbiology
- Clinical Research
- Infectious Diseases
- Psychology
- Pharmaceutical Sciences
- Chronic Diseases
- Community Health
- Building-Related Illnesses
- Human and Medical Genetics

The selection of supervisor(s) will depend very much on the research area and be based on mutual agreement between both parties. The principal supervisor must be engaged within IMU whereas a co-supervisor can be from any established institution. All supervisors are subject to the credentialling guidelines of IMU.

ASSESSMENT

Both programmes are research-based and degrees will be awarded by IMU on successful completion of a thesis. Examination is by assessment of the thesis, and includes an oral examination of the contained research.

For PhD, there is also provision for candidates to submit their theses in the form of published works resulting from their research projects during period of their candidature, subject to the evaluation by the Review Committee.
ENTRY REQUIREMENTS

MSc in Medical and Health Sciences
A Bachelor Degree with minimum cGPA of 2.75 or equivalent, as accepted by the University’s Senate; or

A Bachelor Degree or equivalent with minimum cGPA of 2.50 and not meeting cGPA of 2.75, can be accepted subject to rigorous internal assessment; or

A Bachelor Degree or equivalent not meeting cGPA of 2.50, can be accepted subject to a minimum of 5 years working experience in relevant field.

PhD in Medical and Health Sciences
Applicants are required to have obtained:

A Master’s Degree accepted by the University’s Senate; or

Other qualifications equivalent to a Master’s degree that are accepted by the University’s Senate.

Note
i. There shall be no direct entry from Bachelors degree level to Doctoral degree level.

ii. Candidates with Bachelors degree who are registered for Master’s degree programmes may apply to convert their candidacy to the doctoral degree programmes within ONE (1) year after Master’s degree registration, subjected to:
   a. having shown competency and capability in conducting research at Doctoral Degree level
   b. rigorous internal evaluation by the University
   c. approval by the University’s Senate

ENGLISH LANGUAGE REQUIREMENTS

For International Students

1. IELTS : Band score 5.0; or
2. TOEFL (PBT) : Overall score of 410-413; or
3. TOEFL (iBT) : Overall score of 34; or
4. Cambridge English : Advanced (CAE) : Overall score of 160; or
5. Cambridge English : Proficiency (CPE) : Overall score of 180; or
6. Pearson Test of English (PTE) : Overall score of 36

The following categories of students are exempted from the above requirements:

1. International students from countries in which English is the first language.
2. International students who graduated from any Malaysian or other institutions where the curriculum is delivered in English.
**Why Study Medical and Health Sciences at IMU?**

1. **An Established Private Healthcare University**
   IMU is Malaysia’s first and most established private medical and healthcare university with over 28 years of dedicated focus in healthcare education. IMU achieved the SETARA-2017 Tier 6 status (Outstanding) under the Mature University category.

2. **Renowned and Highly Experience Faculty**
   Students will be supervised by staff who are experts in their field with well-established reputations nationally and internationally. The academic community of IMU pursues and achieves excellence in a wide range of research activities. Many of them present their findings in international conferences to keep up to date with the latest development in specialised areas. They also publish their findings in international peer-reviewed journals.

3. **Research Funding**
   Our researchers have successfully obtained external funding through government grants such as the Fundamental Research Grant Scheme (FRGS), Exploratory Research Grant Scheme (ERGS) and MESTECC R&D Fund. In addition, internal grants worth more than RM1,000,000 per year are invested to support research at IMU.

4. **Research Facilities**
   The IMU has good infrastructure and facilities to support research. There are eight research laboratories and eight tissue culture laboratories for medical science research with a total floor space of 26,000 sq ft. The University also has an animal storage facility with expanded space (about 770 sq ft) and state-of-the-art caging and maintenance of experimental animals. Adequate funding support for research facilities is provided.

5. **Research Partnerships**
   Students will benefit from the University’s research collaborations with various local and foreign institutions in areas such as cancer, bioactive molecules, nutrition and environmental health. Close links have also been established with local hospitals, especially Hospital Tuanku Ja’afar in clinical research.
Dato’ Prof Sivalingam Nalliah is currently Professor of Obstetrics and Gynecology at the Faculty of Medicine and Health, IMU. He is Fellow of the Royal College of O&G (UK). Has MCGP, Master in Education and has been involved in clinical research and quality assurance programmes in O&G. He was chair of the Confidential Inquiry into Maternal Deaths in Malaysia and was pivotal in editing/contributing to teaching manuals in Hypertensive Disorders in Pregnancy and Heart Disease in Pregnancy apart from production of the Annual Report of the CEMD and FIGO Awardee for Emergency Obstetrics in 2002. He has authored/edited several medical books and two non-medical books. His research interests are medical ethics, medical education, gynecology cancer and gestational diabetes. He has over 150 publications to his credit.

Prof Winnie Chee has been in academia for 30 years. Her research is focused on nutritional determinants of bone health in children and adults, Vitamin D and nutrition intervention for obesity, diabetes and renal. She has been recognised for her service to local and international nutrition and dietetics. She was appointed as Fellow of Malaysian Dietitians’ Association and Nutrition Society of Malaysia. She has also received the Wimpfheimer- Guggenheim International Lecture Award from the Academy of Nutrition & Dietetics, USA. She has served three terms and is the current President of the Malaysian Dietitians’ Association (MDA).

Prof Chu Wan Loy has been actively involved in Algal Biotechnology research for more than 20 years. Prof Chu, as an active member of the Malaysian Antarctic Research Programme (MARP) went on three expeditions to the Antarctic and Arctic. His research interests cover many aspects of algal biotechnology, ranging from bioactives and nutraceuticals (e.g. anticancer, antiviral and antioxidant compounds) from algae, applications of algal in environmental health (e.g. bioremediation and toxicity testing), algae for biofuels to stress adaptation in tropical and polar algae. Prof Chu is presently the Dean of the School of Postgraduate Studies of IMU. Prof Chu has published over 80 papers in refereed journals and 5 book chapters and has presented his work in more than 60 international conferences. He has successfully supervised 8 PhD and 17 MSc students.

Prof Leong Chee Onn has conducted multi-year research focused on drug target discovery, novel molecules development through preclinical and clinical trials, and biomarkers development for diagnosis of refractory breast cancers. He has published extensively in high impact journals, including Nature Cell Biology, Cancer Cell, PNAS, Cancer Research and etc. He has received numerous international awards including the FMD Fellowship (USA), the Institute of Biomedical Science President’s Award (UK) and the Top Research Scientist Malaysia (TRSM). He was a Senior Research Fellow at the Harvard Medical School and Massachusetts General Hospital, Boston, USA and is presently a Fellow at the Royal Society of Biology, UK, and the Deputy Director of Research at the International Medical University, Malaysia.
Why Study at IMU?

The International Medical University (IMU) is Malaysia’s first and most established private medical and healthcare university. IMU’s mission is to maintain its status as a world-class university that fosters teamwork, curiosity, dedication to excellence, and personal and professional development. IMU is the only private university in Malaysia that has been awarded the SETARA-2017 Tier 6 status (Outstanding) under the Mature University category. The university has a strong reputation nationally and internationally. The academic community at IMU pursues research and achieves excellence in a wide range of research activities. Many of them present their research at international conferences and publish their findings in international peer-reviewed journals.

Students will benefit from the University's research collaborations with various local and foreign institutions. Close links have also been established with local hospitals. Adequate funding support for research facilities is provided. More than RM1,000,000 per year are invested to support research at IMU. Research at IMU is multi-disciplinary and covers a wide range of fields, including medical, health-related sciences, management, and social sciences. It is also a centre of excellence in traditional medicine studies. Research at IMU is recognised for its high quality and impact.

Research at IMU is multi-disciplinary and covers a wide range of fields, including medical, health-related sciences, management, and social sciences. It is also a centre of excellence in traditional medicine studies. Research at IMU is recognised for its high quality and impact. The university’s research is focused on nutritional determinants of health (e.g. bioremediation and toxicity testing), algae for biofuels to stress adaptation in tropical and polar algae. The research also investigates the bioactive compounds from algae, applications of algae in environmental health (e.g. bioremediation and toxicity testing), algae for the development of biofuels, and traditional uses of medicinal plants. The research is sponsored by various funding agencies, including the Malaysian National Foundation, the Ministry of Higher Education, and the Malaysian Research Council.

Not only does IMU own a team of experts with vast experience in healthcare, it also consistently upgrades its facilities and services to ensure cutting-edge learning experience for the students to excel. As a research student, IMU’s active participation in community projects and close collaboration with scientific bodies have gotten me golden opportunities to attend talks, workshops, seminars and invited-only conferences to keep up with the rapidly changing healthcare industry, and even present my work at some! With all these, I know by the time I graduate from the programme, I am confident to tell the world that I am a well-trained researcher and am ready to serve.

What Our Students Say

My current research work in IMU aims to provide scientific evidence for traditional uses of medicinal plants. The deciding factors for me to leave my home country to IMU are its respectable research culture, state of art facilities and availability of expertise in my research area. With guidance from my supervisors and support from the research team, my research skills are being continuously improved. 

Zhang Shiming PhD

Being an undergraduate alumnus in IMU, I am back to my alma mater to pursue my postgraduate studies (Master of Science in Medical and Health Sciences). Throughout my studies here, I am involved in a collaborative research project with the University of Malaya, investigating on the dynamics of an infectious disease, cholera. I have gained so much of research experiences with the guidance from my supervisors and support from the IMU Research Laboratory and School of Postgraduate Studies. The diverse background of the existing research students also makes the whole journey to be fun, especially when we have the opportunities to share our ideas and opinions in research talks, conferences and seminars. I believe that the knowledge gained from this programme will provide a smooth transition for my professional development in the future. All in all, it is a privilege being a part of the interactive research community in IMU.

Toh Yien Shin PhD

Postgraduate studies in IMU is of world-class. I am equipped with sufficient knowledge and skills to secure a job in a nutraceutical company in New Zealand after completion of my Master of Science in Medical and Health Sciences degree in IMU. When I wanted to pursue PhD, I chose IMU. I am honoured to receive the sponsorship from JPA for my PhD study. In addition to that, I am also honoured to receive YPASM Fellowship that enable me to work with the scientists in the British Antarctic Survey at Cambridge, United Kingdom. All of the experiences would not have been possible without the support and guidance from my supervisors. IMU has positively impact me on going forward.

Dang Nguk Ling PhD

Pursuing my postgraduate studies with IMU is a choice I will never regret. Not only does it own a team of experts with vast experience in healthcare, it also consistently upgrades its facilities and services to ensure cutting-edge learning experience for the students to excel. As a research student, IMU’s active participation in community projects and close collaboration with scientific bodies have gotten me golden opportunities to attend talks, workshops, seminars and invited-only conferences to keep up with the rapidly changing healthcare industry, and even present my work at some! With all these, I know by the time I graduate from the programme, I am confident to tell the world that I am a well-trained researcher and am ready to serve.
