What is IMU’s Medicine Programme About?

OVERVIEW

The IMU Medical programme is divided into 2 parts: Medical Sciences and Clinical Training.

The first 2½ years focuses on the Medical Sciences and is undertaken at the University’s campus in Bukit Jalil. Upon completion of the Medical Sciences, students proceed to the clinical training. Students may choose to undertake this training either at the IMU Clinical Campus Seremban for another 2½ years, or at a Partner Medical School (PMS) overseas. The overseas duration varies from 2 to 4 years.

The IMU has an integrated system-based curriculum for its medical programme and uses a variety of approaches to its teaching-learning activities. These include lectures, problem-based learning (PBL), task-based learning (TBL), practical classes, independent learning, clinical skills sessions and clinical training with patient contact. Clinical training is carried out at Hospital Tuanku Ja’afar Seremban, Hospital Jempol, Hospital Tuanku Najihah Kuala Pilah, Hospital Port Dickson, in Negeri Sembilan; Hospital Sultanah Nora Ismail in Batu Pahat, Hospital Enche’ Besar Hajjah Khalsom in Kluang, Johor, and other teaching hospitals and health clinics in Negeri Sembilan and the Klang Valley.

From August 2017, we have incorporated the United States Medical Licensing Examination (USMLE) Step 1 Preparatory Course into the IMU medical curriculum across Semesters 1 to 5. This is to allow IMU medical graduates to begin early preparation to sit for USMLE Step 1 examination that carves a path towards United States residency opportunities.

Students will have the opportunity of doing their clinical electives in selected hospitals in the USA to enhance their learning experience in different healthcare systems.

The early exposure of students to clinical experiences emphasises the importance of clinical application of basic science and serves to stimulate students’ interest in Medicine.

The curriculum is reviewed periodically and is subject to change.
The MPU modules are compulsory modules imposed by Ministry of Higher Education under the Private Higher Educational Institutions Act 1996 (Act 555). All students must take these modules and pass as a prerequisite for the award of the degree.
RECOGNITION OF DEGREE

The IMU awards the Medical degree of MBBS (IMU) to students upon completion of the IMU 5-year Medical programme. This degree is recognised by the Malaysian Medical Council (MMC) and accredited by the Malaysian Qualifications Agency (MQA). The degree is listed in the World Directory of Medical Schools.

The Partner Medical Schools (PMS) award their respective degrees to students upon satisfactory completion of their programmes. Graduates from IMU’s Medical programme and PMS are working in various healthcare facilities in Malaysia and other countries including Singapore, the United Kingdom and Australia.

The School of Medicine was granted 5-year accreditation (2015 - 2020) from Malaysian Qualifications Agency (MQA) for its medicine programme.

CAREER PATHWAY

Medicine offers a vast variety of career choices. Most doctors treat patients full-time, while others also teach, conduct research, manage hospitals and clinics, or develop healthcare policy.

A doctor can work in private hospitals, or start a private practice, either with the basic degree, or after specialisation. A doctor may also choose to remain working with the Government. Doctors can join an academic institution, teach or do research. Doctors can combine medical knowledge and IT skills to develop e-learning modules: the future of medical education.

Medicine has diversified. Increasingly the focus is on preventive healthcare and the management of chronic diseases and ageing population. These are also the areas that many doctors serve.

ASSESSMENT

A variety of assessment methods are employed in the medical curriculum to assess the learning outcomes. This includes various types of:

- Multiple Choice Questions (MCQ)
- Objective Clinical Examination (OSCE)
- Objective Practical Examination (OSPE)
- Modified Essay Questions (MEQ)
- Essay Questions (SEQ)
- Extended Matching Question (EMQ)
- Short Answer Questions (SAQ)

CLINICAL TRAINING

Clinical exposure to patients starts as early as Semester 1 and throughout the integrated system modules in Semesters 2, 3 and 4. In Semester 5, students spend 4 full weeks in hospital postings. In the clinical years from Semester 6 to Semester 10, students are posted to the full range of major medical and surgical specialties.

Clinical and hospital postings are conducted in hospitals and health clinics including:

- Hospital Tuanku Ja’afar Seremban
- Hospital Port Dickson
- Hospital Kuala Kubu Bharu
- Hospital Orang Asli, Gombak
- Hospital Enche’ Besar Hajjah Khalsom Kluang
- Hospital Jempol
- Hospital Tuanku Najihah Kuala Pilah
- Hospital Sultanah Nora Ismail Batu Pahat
- Several health clinics in Negeri Sembilan and the Klang Valley

Currently, Semester 10 students undergo their 6 months of Senior Clerkship at Hospital Sultanah Nora Ismail Batu Pahat or Hospital Enche’ Besar Hajjah Khalsom Kluang. During this semester, students work in wards as shadow house officers under the supervision of senior clinicians, in order to prepare them for their housemanship. This is important for the students as they will be provided the opportunity of hands-on incremental responsibility for patient management.

Overseas Clinical Electives

Students will have the opportunity of doing their clinical electives in selected hospitals in the United States in order to enhance their learning experience in different healthcare systems.
RECOGNITION OF DEGREE
The IMU awards the Medical degree of MBBS (IMU) to students upon completion of the IMU 5-year Medical programme. This degree is recognised by the Malaysian Medical Council (MMC) and accredited by the Malaysian Qualifications Agency (MQA). The degree is listed in the World Directory of Medical Schools.

The Partner Medical Schools (PMS) award their respective degrees to students upon satisfactory completion of their programmes.

Graduates from IMU’s Medical programme and PMS are working in various healthcare facilities in Malaysia and other countries including Singapore, the United Kingdom and Australia.

The School of Medicine was granted 5-year accreditation (2015 - 2020) from Malaysian Qualifications Agency (MQA) for its medicine programme.

CAREER PATHWAY
Medicine offers a vast variety of career choices. Most doctors treat patients full-time, while others also teach, conduct research, manage hospitals and clinics, or develop healthcare policy.

A doctor can work in private hospitals, or start a private practice, either with the basic degree, or after specialisation. A doctor may also choose to remain working with the Government. Doctors can join an academic institution, teach or do research. Doctors can combine medical knowledge and IT skills to develop e-learning modules: the future of medical education.

Medicine has diversified. Increasingly the focus is on preventive healthcare and the management of chronic diseases and ageing population. These are also the areas that many doctors serve.
Medical graduates are required to have SPM-level BM qualification certificate in order for them to be appointed into the public service.

International students are advised to check with the professional bodies for their internship / practising opportunities.

Presently, non-Malaysians are not eligible for housemanship positions in Malaysia.

**Note**
- Full duration of study for the Medical programme (undergraduate and graduate entries) is 4½ to 6 years, depending on the university of choice.
- The list of partner universities is subjected to change.

**Graduate Entry**
3 For University of Warwick, student with a first degree on entry may transfer after 2½ years. The qualification should fulfil the following, with final approval from the University of Warwick:
   a. Students can transfer to a graduate school provided that they have a first degree in biological, natural, physical or health sciences. If the Degree does not fall into this category, IMU will refer to University of Warwick for clearance.
   b. The First Degree must be obtained not more than 10 years ago. If the Degree has been conferred for more than 10 years, the students have to get another degree or do Bachelor in Medical Sciences (Hons) at the IMU to qualify for the graduate school.
   c. The students should not be younger than 18 years old at transfer.
   d. The minimum entry requirement IMU will accept into the Medical programme with the First Degree is CGPA 5.5 out of 7.0 (for Australian universities). For the USA and Asian countries, the CGPA accepted is 3.5 out of 4.0.
   Students without a first degree will have to spend another half a year to complete the IMU Bachelor in Medical Sciences (Hons). Tuition fees for this programme is for semesters 6 and 7.
4 For Australian National University and University of New South Wales, students are required to complete the IMU Bachelor in Medical Sciences (Hons) prior to transfer.
5 The fee for the bridging course varies and is dependent on the institution of choice.
What is IMU’s Medical Sciences Programme About?

OVERVIEW

The Bachelor in Medical Sciences (Hons), (BMedSc) programme was initiated in 2003 and is an accredited 3 years honours degree. The first 2½ years focus on the Medical Sciences as part of the IMU Medical programme (MBBS) in Bukit Jalil campus.

On completion, the Phase 1 MBBS students are eligible to spend an additional two (2) semesters to undertake a research project and submit a dissertation. Students will be supervised on the preparation of research proposal, designing and executing of research methodology using various scientific tools, data analysis, presentation and preparation of the dissertation and manuscripts for publication. In addition, there is a coursework covering various aspects of research methodology. At the end of this programme, students will be equipped with new knowledge and practical experience in the areas of:

- Scientific research methodology
- Analytical skills during data analysis and evaluation of results
- Statistical methods relevant to research
- Application of information technology to research
- Ethical issues pertinent to research
- Scientific writing
- Literature search and review process
- Health and safety issues in laboratory and experimental practice

This degree is a prerequisite for those who intend to transfer to the Graduate Partner Medical Schools (PMS). However, it is also offered to those who are transferring to undergraduate PMS and Seremban Clinical Campus. This is another option for students who wish to exit the programme with an honours degree in Medical Sciences.
# How Much Does It Cost?

An Established Private Healthcare University
IMU is Malaysia’s first and most established private medical and healthcare university with over 28 years of dedicated focus in healthcare education. IMU achieved the SETARA-2017 Tier 6 status (Outstanding) under the Mature University category.

Build Your Future Healthcare Professional Network
As IMU offers the widest range of healthcare programmes, our students are fully immersed in a vibrant community of students and practitioners from all healthcare fields. This allows for the development of strong friendship amongst peers that will be the foundation of an extensive healthcare professional network upon graduation.

Largest Private Medical School in Malaysia
IMU’s MBBS programme was established in 1999 and to date has the highest number of faculty members, registered students and successful graduates of any other private medical schools in Malaysia. The School has been re-accredited by Malaysian Qualifications Agency (MQA) and Malaysia Medical Council (MMC) for maximum duration of 5 years (2015 - 2020).

CurriculumBenchmarked to International Standards
IMU’s medical curriculum has been developed to meet high international standards and is accepted by 21 international partner universities for credit transfer into their medical programmes. The medical curriculum is not only benchmarked to meet high international standards but now it also provides a pathway for our graduates to train and work in the United States with the incorporation of the USMLE Step 1 Preparatory Course into the IMU medical curriculum across Semesters 1 to 5. This is to allow future medical graduates to begin early preparation and be competent to sit for USMLE Step 1 examination that carves a path towards United States residency opportunities.

Better Preparation for Housemanship and a Career as a Doctor
With clinical exposure as early as Semester 1 and an intensive 6-month Senior Clerkship at Hospital Sultanah Nora Ismail Batu Pahat / Hospital Enche’ Besar Hajjah Khalsom Kluang in Semester 10 (unique in Malaysia), students are better prepared for patient care, housemanship training and to become better doctors.
